

## Exercise 1

---

Build a knowledge base in which the following knowledge is represented: Father, Mother, GrandMother, GrandFather, Aunt, Uncle, Niece, Nephew, Mother of at least 3 sons, Father of at most 2 Daughters.

### First Order Logic

$$\begin{aligned} & \text{parent}(\text{Fabrizio}, \text{Simone}) \\ & \text{parent}(\text{Rossella}, \text{Simone}) \\ & \text{woman}(\text{Rossella}) \\ & \text{man}(\text{Fabrizio}) \\ & \text{parent}(X, Y) \wedge \text{man}(X) \rightarrow \text{father}(X, Y) \\ & \text{parent}(X, Y) \wedge \text{woman}(X) \rightarrow \text{mother}(X, Y) \\ & \text{parent}(X, Y) \wedge \text{parent}(Y, Z) \wedge \text{woman}(X) \rightarrow \text{grandmother}(X, Z) \\ & \text{parent}(X, Y) \wedge \text{sister}(Z, Y) \rightarrow \text{aunt}(Z, X) \\ & \text{parent}(X, Y) \wedge \text{brother}(Z, Y) \rightarrow \text{uncle}(Z, X) \\ & \text{sibling}(X, Y) \wedge \text{man}(X) \rightarrow \text{brother}(X, Y) \\ & \text{sibling}(X, Y) \wedge \text{woman}(X) \rightarrow \text{sister}(X, Y) \\ & (\text{uncle}(X, Z) \vee \text{aunt}(X, Z)) \wedge \text{woman}(Z) \rightarrow \text{niece}(Z, X) \\ & (\text{uncle}(X, Z) \vee \text{aunt}(X, Z)) \wedge \text{man}(Z) \rightarrow \text{nephew}(Z, X) \\ & \text{mother}(X, A) \wedge \text{mother}(X, B) \wedge \text{mother}(X, C) \wedge (A \neq B \neq C) \wedge \\ & \quad \text{man}(A) \wedge \text{man}(B) \wedge \text{man}(C) \rightarrow \text{mother}_3(X) \\ & \text{father}(X, A) \wedge \text{father}(X, B) \wedge (A \neq B) \wedge \text{woman}(A) \wedge \text{woman}(B) \rightarrow \text{father}_2(X) \end{aligned}$$

### ALC

$$\begin{aligned} \text{Father} & \equiv \text{Parent} \sqcap \text{Man} \\ \text{Son} & \equiv (\text{Man} \sqcap \exists \text{hasParent. Person}) \\ \text{Daughter} & \equiv (\text{Woman} \sqcap \exists \text{hasParent. Person}) \\ \text{Mother} & \equiv \text{Parent} \sqcap \text{Woman} \\ \text{GrandMother} & \equiv (\text{Mother} \sqcap \exists \text{hasChild. Parent}) \\ \text{GrandFather} & \equiv (\text{Father} \sqcap \exists \text{hasChild. Parent}) \\ \text{Aunt} & \equiv (\text{Woman} \sqcap \exists \text{hasSibling. Parent}) \\ \text{Uncle} & \equiv (\text{Man} \sqcap \exists \text{hasSibling. Parent}) \\ \text{Sibling} & \equiv (\text{Brother} \sqcup \text{Sister}) \\ \text{Niece} & \equiv (\text{Woman} \sqcap \exists \text{Parent. Sibling}) \\ \text{Nephew} & \equiv (\text{Man} \sqcap \exists \text{Parent. Sibling}) \\ \text{Mother}_3 & \equiv (\text{Woman} \sqcap \geq 3 \text{Son}) \\ \text{Father}_2 & \equiv (\text{Man} \sqcap \leq 2 \text{Daughter}) \end{aligned}$$

## Exercise 2

---

Build a knowledge base in which the following knowledge is represented: All humans are mammals; all mammals are warm blooded. All dogs are mammals. Humans own animals. There are animals that are not warm blooded. All mammals are animals. A human cannot own another human.

## First Order Logic

$$\begin{aligned} &human(X) \rightarrow mammal(X) \\ &mammal(X) \rightarrow warmblooded(X) \\ &dog(X) \rightarrow mammal(X) \\ &own(X, Y) \rightarrow human(X), animal(Y) \\ &\exists X. (animal(X) \wedge \neg warmblooded(X)) \\ &mammal(X) \rightarrow animal(X) \\ &own(X, Y) \rightarrow human(X) \wedge \neg human(Y) \end{aligned}$$

## ALC

$$\begin{aligned} &Human \sqsubseteq Mammal \\ &Mammal \sqsubseteq WarmBlooded \\ &Dog \sqsubseteq Mammal \\ &AnimalOwner \equiv Human \sqcap \exists owns. Animal \\ &ColdBloodedAnimal \equiv Animal \sqcap \neg WarmBlooded \\ &Mammal \sqsubseteq Animal \\ &(Human \sqcap \exists owns. Human). \perp \end{aligned}$$

## Exercise 3

---

### First Order Logic

$$\begin{aligned} &student(X) \rightarrow smart(X) \\ &\exists X. student(X) \\ &\exists X. (student(X) \wedge smart(X)) \\ &\forall X \exists Y. (student(X) \wedge student(Y) \wedge loves(X, Y)) \\ &\forall X \exists Y. (student(X) \wedge student(Y) \wedge loves(X, Y) \wedge X \neq Y) \\ &\exists X. (\forall Y. student(X) \wedge student(Y) \wedge loves(Y, X)) \\ &student(mark) \\ &student(paul) \\ &takes(mark, analysis) \leftrightarrow \neg takes(mark, geometry) \\ &\neg takes(mark, analysis) \leftrightarrow takes(mark, geometry) \\ &takes(paul, analysis) \wedge takes(paul, geometry) \\ &\neg takes(mark, analysis) \end{aligned}$$

$\forall Y. (student(Y) \rightarrow \neg loves(Y, paul))$

## ALC

$Student \sqsubseteq Smart$

$SmartStudent \equiv Student \sqcap Smart$

$(Student \sqcap \exists loves. Student) \equiv Student$

Sentence 5 is not encodable in ALC (I think)

$Student \sqcap \forall loves. Student$

$Mark \sqsubseteq Student$

$Paul \sqsubseteq Student$

$Mark \sqsubseteq ((\exists takes. GeometryExam \sqcap \neg \exists takes. AnalysisExam) \sqcup$

$(\exists takes. AnalysisExam \sqcap \neg \exists takes. GeometryExam))$

$Paul \sqsubseteq (\exists takes. GeometryExam \sqcap \exists takes. AnalysisExam)$

$Mark \sqsubseteq \neg \exists takes. AnalysisExam$

$(Student \sqcap \exists loves. Paul). \perp$
